**Description**

*Provide a short description of the event and its activities.*

Local data gathering 1st workshop goals were to present the DCP project's main idea to participants, defined the definition of digital civic participation with young people, and present the questionnaire. Using non-formal education methods young people mapped the participatory democracy e-tools in the city of Klaipeda, Lithuania, and also in Europe. Young people discussed what digital tools they need to engage more in civic society. Participation in the workshop let young people get more knowledge about already existing and new participatory democracy tools, say their opinion about participatory democracy tools, identified their needs. They had a reflection and said their opinion about workshop quality.

Local data gathering 2nd workshop goals were to present the DCP project's main idea to new participants and to remind participants who already participated in 1st workshop, to analyze already existing participatory democracy e-tools. Using non-formal education methods young people had to map e-tools that they can use in their personal life stages.

It was noticed that young people from 14 to 18 years old lack knowledge about digital civic participation definition. During activities, young people were introduced to digital civic participation definition. Later, they identified what kind of tools they use in their daily life and also what tools can be created in the future.
